**Description:**

The objective of Dar es Salaam Maritime Gateway Project (“Project”), currently under the appraisal stage and expected to be approved in December 2015 by The World Bank, is to improve the effectiveness and efficiency of the Port of Dar es Salaam through defined interventions to reduce the wait time for vessels accessing the port, facilitate the berthing of larger capacity vessels, support greater private sector participation, and improve the management of the port, for the benefit of all public and private stakeholders.

Project has the following three main components:

(a) Improving the physical infrastructure (estimated cost: $400 million) which will finance essential civil works for the improvement of the port infrastructure including construction of a new berth, increasing the capacity of the grain silo and installation of a conveyor system, and undertaking entrance channel and port basin deepening and widening. It will also facilitate the improvement of immediate access roads;

(b) Improving the operational and spatial efficiency (estimated cost: $35 million) which comprises two sub-components:

   – Improving the operational efficiency of the port which will include reviewing and strengthening standard operational procedures, key performance indicators and tariffs; and introduction of a Port Community System; and

   – Improving the spatial efficiency of the port which will include Removal and reallocation of unused facilities; improving traffic flow by introducing one-way traffic and improvements to access gates; and Improvements in rail linkages and platform;

(c) Institutional strengthening and implementation assistance (estimated cost: $30 million).

**G&A Value Add:**

*In this section, we cover “Country and Sector” synopsis along with the detailed “Project Procurement Information” and the key contact details of the MDBs and the implementing agencies.*
